

PETITION TO THE BOARD OF SUPERVISORS
SAN FRANCISCANS FOR SAFE QUALITY WATER

NO GROUNDWATER IN OUR DRINKING WATER!

On April 18th, the SFPUC began adding groundwater from the Westside Aquifer to our Hetch Hetchy drinking water supply. This groundwater has unsafe levels of contaminants and is only minimally treated. It should not be used for drinking.

Tell the SFPUC to stop mixing contaminated groundwater with our good drinking water!

Demand that:

- ◆ All San Francisco drinking water must meet or exceed our current Hetch Hetchy water quality.
- ◆ Groundwater *should not* be used for drinking water.
- ◆ Use groundwater for irrigation, firefighting and street cleaning.
- ◆ The SFPUC must develop a plan to provide an adequate supply of high-quality drinking water during an emergency until full service is restored.
