

Coalition For San Francisco Neighborhoods

History:

Coalition for San Francisco Neighborhoods (CSFN) was created in 1972 by nonpartisan neighborhood groups who were concerned about height and bulk issues, a police station closure, and district voting. 50 years later we are still dealing with the same issues. Call us consistent.

Purpose:

We work to support the needs of the neighborhoods as they struggle with their individual problems and find ourselves closely aligned on most issues. We are concerned with City, County and State decisions that affect our lives and lifestyles. Our members have reached out to a few state-wide organizations and keep us informed about what our state representatives are doing.

Public Engagement:

If you would like to learn more about CSFN and our neighborhood organizations, please consider coming to one of our General Assembly meetings where we invite guest speakers to fill us in on issues that concern our members and the citizens of San Francisco. Our June 20, 2023 guest will be Supervisor Peskin.

Join CSFN:

Our General Assembly meetings are open to all people actively seeking information that they may share with their neighbors. We invite other non-partisan neighborhood organizations seeking to protect and improve their communities to consider joining us.
