Gashouse Cove and the north SF Waterfront

By Captain Maggie Hallahan

I look forward to meet with you all Tuesday about recent work to protect an important north San Francisco waterfront area from being decommissioned from it's current aquatic sports and maritime emergency response from miss leading pretenses coming from SFRP.

I have attached a few recent developments related to this matter for your review:

- Harbor Safety Committee [letter](#) to BCDC and supporting adhok [research](#) regarding the importance of Gashouse Cove.
- Gashouse Cove [podcast](#) on Latitude 38.
- Gashouse Cove Latitude 38 [article](#).
- A [letter](#) I received as a DBW Commissioner from California State Parks, Division of Boating and Waterways (DBW), regarding the oversight of marine fuel facilities in California.
- The work the Sea Scout have been doing to keep [Gashouse Cove](#) for over a year
- California State Lands Commission June 23, 2026 [public comment](#) first 10 min are the Sea Scouts.
- [New Design](#) keeping a working SF 1.0 marina draft SF Sea Scouts Gashouse Cove

Please let me know if you have any questions I can provide the details during our zoom talk. What everyone is concerned about is there is a state oversight gap to provide emergency response maritime sites and Gas and Diesel fuel please see the red x's for recent closers of fuel docks. We are trying to preserve maritime safety and education especially for our working class families and youth of San Francisco.

Best regards,

Captain Maggie Hallahan

BCDC Director Goldzband,

Please find attached the official correspondence from the Harbor Safety Committee of the San Francisco Bay Region (the "Committee") regarding the Gashouse Cove fuel dock and San Francisco Bay maritime resiliency.

The attached letter is addressed to Executive Director Larry Goldzband of the San Francisco Bay Conservation and Development Commission (BCDC) and details the

Committee's serious concerns regarding the proposed closure of the fuel dock, specifically relating to emergency preparedness, navigation safety, and maritime resiliency.
